## QVscribe for Word and Excel – 3.4.8 Release Notes

- 1) UI changes to Excel to align closer to Word UI implemented such as:
  - a) Marking options now in the ribbon
  - b) Marking options available via right-click
  - c) New expanded logic for the list of available columns selectable for the ID column
- 2) The following pre-requisites have been changed:
  - a) .NET Runtime 4.6.2 or Greater
  - b) VSTO Runtime – 10.0.60828 or Greater
  - c) VC++ (both x86 and x64) – 14.26.28720 or Greater
- 3) Now compatible with TLS-2.0 SSL Protocol
- 4) Marking instructions updated
- 5) Switching licenses (from Individual to Teams and vice-versa) no longer requires a restart.
- 6) Implemented a new button to clean all QVscribe metadata
- 7) The QVS Analyzer process will now shutdown when Excel/Word are closed
- 8) Full support for AdoptOpenJDK (JDK8U282-B08) alongside current Oracle JRE offering

Alongside these listed changes, there are numerous bug fixes available in this release. QRA is constantly working to improve our product and reduce any potential roadblocks in your requirement authoring processes.
